

## Severo Ochoa 2 Synthesis Actions Call 2025 – (SO2-SA-2026)

### Call results

Rafael Poyatos (Synthesis Actions Coordinator)

Maria Josep Broncano (Severo Ochoa 2 Scientific Coordinator)

Javier Retana (Severo Ochoa 2 PI)

---

### 1. Submitted proposals

- Sara Marañón. Timescales & Thresholds: A ForHot-based synthesis of ecosystem resilience under sustained warming.
- Felipe Siqueira Campos. ESP Summer Schools 2026: Ecosystem Services Modelling and Biodiversity Indicators.
- Lluís Brotons, Tristan Bakx. Bird diversity responses to wildfire and human-controlled fire regimes – FireBird, a global database on bird responses to fire.
- Daniel Sol. FLEXIMAL: the role of cognition in buffering long-lived animals against environmental challenges.

### 2. Selected proposals

Based on the evaluation criteria in the call, all proposals are of high quality, they will result in a diversity of activities contributing to the international visibility of CREAM and will yield relevant outcomes.

Given the scientific quality and high value of the proposals **all 4 proposals have been selected for funding**.
