

THE RAMON MARGALEF SUMMER COLLOQUIA

A view of the ocean from Barcelona

2016

Microbes in a changing world: diversity and biogeochemistry

10-15 July

Institut de Ciències del Mar, Barcelona

- Patterns of microbial diversity. Are there general rules?
- Interactions between microorganisms and between micro- and macroorganisms: strategies to be successful
- Microorganisms and ecological theory. Are there unifying principles?
- Drivers, players and products. Environmental physical dynamics and their effects on diversity and biogeochemical cycling
- Global Change: The responses of small organisms
- Molecular biology and biogeochemical cycling. From genes to fluxes

Grants for students
